Customer Name:	<b>6</b>
Notes:	

**1.** This is where you will fill in how long you would like each side to be. This is the length including finish materials that we will supply to you.

**2.** Overall view of outdoor kitchen shape. Shows where each end will join with what side. Side B will attach to End 1 of Side A and End 2 of Side C as shown. Select the shape that best suits your needs.

**3.** Templates. Each vertical line represents 6". At the top, the template is marked out in 12" increments for reference.

**4.** Templates. There are 3 horizontal lines on each template to make it easier to draw. Use the top line as the back of all components you place into the countertop.

The middle line is where the grills, burners, and beverage center will end.

The bottom line is where all storage cabinets will begin, and they will end just under the middle line (where grill ends)

Examples of this are in the instructions on the next pages.

**5.** For this section, there are two columns. First, select your component from the options list in this template. Next, write the option number down in the column Option #. Now, look at the option sheet again to find the width of the component. Draw the component on the template as shown in the examples on next pages. Finally, write the position # shown next to the option # you entered. This ties the list of options together with where you want them placed.

**6.** This is where you will tell us what finish and countertop materials you want, your name, and any notes you think we need to know, like if there are sections of the outdoor kitchen against a wall, etc. This helps us to get your quote as close as possible the first time. If you decide to move forward, we will reach out with a few more additional questions to ensure we get everything right.

# Template Instructions

## Step 1:

Enter the length you would like each side to be

## Example:

We want side A to be 120" long, side B to be 72" long and side C to be 120-1/2" long.

**\*\*Note: side B will sit between side A and side C, therefore, the total length of side B will equal 29" from side A and 29" from side C plus 72" 29+29+72=130"**

## Step 2:

Draw a line on the module where you want the module to end and mark out the area no longer needed with pen as shown. We recommend a colored pen to help it show up better on the drawing.

## Step 3:

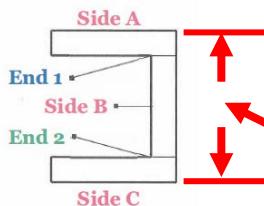

Draw a box around the area where side B will join side A & C and draw as X shown. This area is not open for appliances or storage (except the drop in ice chest since it sits on top of counter).

## Template Instructions: Continued

### U Shape Outdoor Kitchen Template

Side A Length 120 "

Side B Length 72 "

Side C Length 120 1/2 "

Option Number	Appliance	Overall Width	Model Number
DDC		32-1/2"	BLZ-DDC-R

Using the options sheet, locate the components you want to use. The option number and overall width will be used in for this template.

\*\*Note: You can use the model number to look the component up on our site.

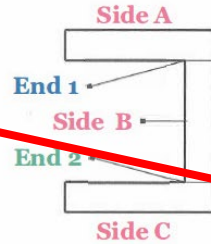

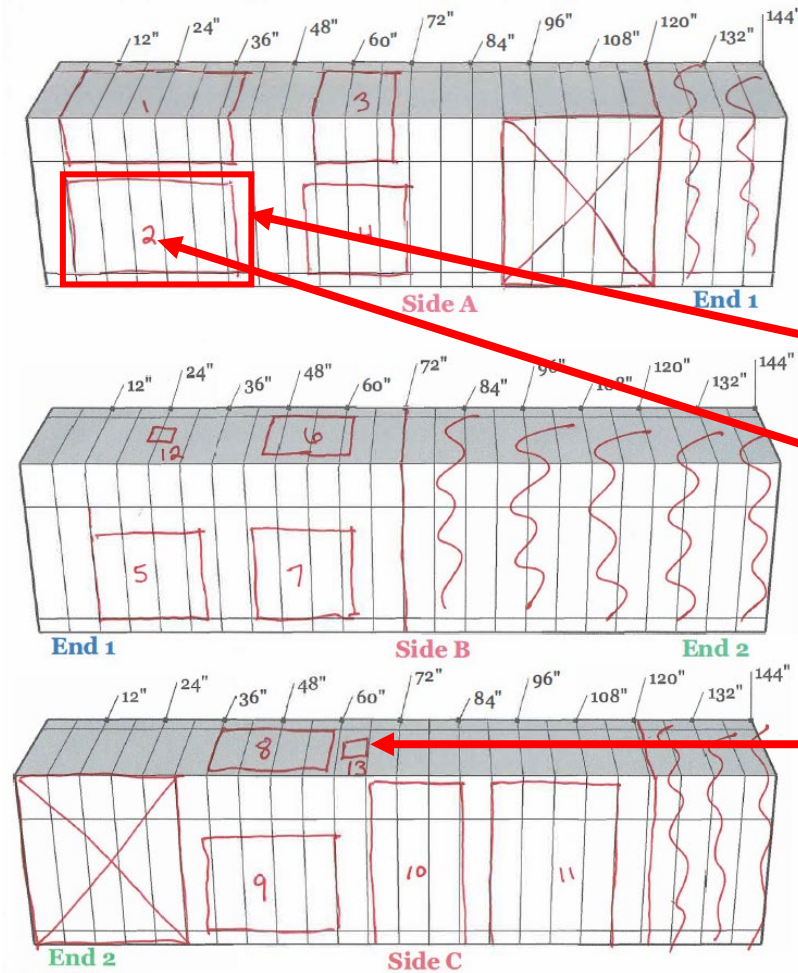

Step 6:

Using the overall width from the options sheet, draw your component on the template where you would like it placed as shown.

Next, write the position number inside the box you just drew. Locate the position number on information list and write the option number for that component in the blank as shown.

\*\*Popup GFCI outlets are not on the option sheet. Simply place them as shown and write GFCIPU in the Option # block.

Enter your name, choices for finish and any notes you feel will be helpful to getting an accurate quote. **Don't worry about getting it exactly right, we will work with you on all the details if you choose to move forward with the order.**
